#### Advantages of **SEIRIN** Acupuncture Needles

SEIRIN needles are very comfortable to insert, which makes the dry needling or acupuncture completely stress free for me. Seirin needles ensure for me an very high level accuracy during treatment.

#### How to use **SEIRIN** Acupuncture Needles, Clinical Application of Pyonex / **B-Type** / **J-Type** / **J-15**

I m a sports physiotherapist and osteopath. In my case I m using the needles mainly for Sports Acupuncture and I have to say it works perfect! I m working with high class professional tennis players and they very often suffering from tight muscles including trigger points. I m travelling several times per year around the world and get in touch with many different brands so far but Seirin needles are by far the best! Especially with the professional athletes I have very good results as me as a private physiotherapist have to get the athletes as soon as possible ready to compete to be basically able to earn their money! I basically use B, J and J-15 type needles, I m very impressed of the quality of the needles as at the dry needling you can even use 1 needle for several times to insert in the skin! I usually work with Sports Acupuncture and experienced very good results especially when I use Seirin needles!
